# REACH CONFERENCE 2018

---

**REACH Conference 2018** is organized for the eleventh time combining lecturers and participants from different sectors of industry, authorities, academia and other stakeholders. Now we are in the full speed of REACH legislation (10 years on) reaching the important milestone to complete registration of substances above 1 tonne per year. After the first results published, still more than 5000 cases are in process actually with a deadline of August 31, 2018.

**REACH registration 2018 deadline** is a challenge especially for SMEs. Subsequent duties for downstream users in the supply chain are under implementation. Exposure scenarios and e-SDSs are more and more frequent and creating new tasks for all of involved. Also authorisation process is on the place—the Candidate list now containing a total of 181 entries and the Authorisation list contains 43 unique substances/entries. Further restrictions are applied by revision of Annex XVII. Overlaps with other legislative sectors is under evaluation, but very important is the REACH and CLP REFIT evaluation (REACH and CLP Review 2017).

## ***So what are the results and what will be next after REACH 2018?***

Experiences, difficulties, learning lessons as well as good practices will be discussed during the REACH Conference 2018...

We focus also on REACH implementation in Small and Medium Enterprises.

Language of the REACH Conference 2018 is English only.

Simply there is a lot of what to discuss so you should not miss this opportunity!

    - REACH Authorisation
    - REACH & Articles
    - REACH vs other sectors
      - Industry vs chemicals legislation
      - SDS / E-SDS and Exposure Scenarios
      - Downstream Users Duties & Communication
      - Enforcement
      - Tools and Solutions
      - Chemicals legislation after 2018
- 

## ***Downstream User Tasks under REACH After Registration and Available Tools***

*September 5, 2018*

will take place free of charge (for the REACH Conference attendees) registered also for this training.  
***Solely registration for this training only is also possible but is a matter of a fee.***

Training is focused on downstream users duties under management of chemicals in manufacturing processes, a proper supply chain management and the development of sustainable products, systems and technologies in overall respect of environmental and human health objectives, all in frame of REACH and other EU legislation. Training will be organized in cooperation with EUROMETAUX—European Association of Metals.
