REACH CONFERENCE 2019

REACH Conference 2019 is organized for the twelfth time combining lecturers and participants from different sectors of industry, authorities, academia and other stakeholders. Now REACH legislation reached the important milestone completed registration of substances above 1 tonne per year on the European market. Still data quality of dossiers is a challenge.

Subsequent duties for downstream users in the supply chain are under implementation. Exposure scenarios and e-SDSs are more and more frequent and creating new tasks for all of involved. Also authorisation process is on the place—the Candidate list now containing a total of 181 entries and the Authorisation list contains 43 unique substances/entries. Further restrictions are applied by revision of Annex XVII. Overlaps with other legislative sectors is under evaluation, but very important is the REACH and CLP REFIT evaluation (REACH and CLP Review 2017).

So what are the results and what will be next after REACH 2019?

Experiences, difficulties, learning lessons as well as good practices will be discussed during the REACH Conference 2019...

We focus also on REACH implementation in Small and Medium Enterprises. Language of the REACH Conference 2019 is English only. Simply there is a lot of what to discuss so you should not miss this opportunity!

The most important topics to be discussed:

- EU CHEMICALS LEGISLATION—Industry sectors REACH / CLP Impact and Strategies
 - REACH Authorisation
 - REACH & Articles
 - REACH vs other sectors
 - Industry vs chemicals legislation
 - SDS / E-SDS and Exposure Scenarios
 - Downstream Users Duties & Communication
 - Enforcement
 - Tools and Solutions
 - Chemicals legislation after 2019
